

About Us

Aaxis Nano Technologies Pvt. Ltd. founded in 2000 is the leader in serving science, technology, Process Analytics, Environment and Emission monitoring, Flow management, Process instrumentation & Automation, Laboratory Products, Hydrology, Geology, Metrology, Utility management system and data Acquisition & Management software.

We an ISO 9001.2015 certified Organization are a specialized service provider to cater the requirements of various Industries like Paper, Cement, Steel, Oil & Gas, Fertilizers, Chemicals Textiles, Tannery, Slaughter houses, Petro chemicals, Water and sewage treatment plants, Ground water and River monitoring through Pollution Control Board and various other Govt. agencies.

We have adopted process of continual improvement with customer focusing approach. We have our offices in all major cities of India to have reach and connection with our customer and market. A state of art world class manufacturing site at NOIDA is supported by excellent networking and trained Professionals to meet global standards. Our team is specialized in execution of small as well as big projects on turnkey basis.

Quality Policy

To be the market leader in field of Environment monitoring system through >>>>>>>

Quality standards of products and processes

Adopting the policy of continual improvement

EHS Compliance

Training & Development of our employees

Process Automation & Control

Environment Monitoring

Instrumentation-Laboratory, Portable & Online

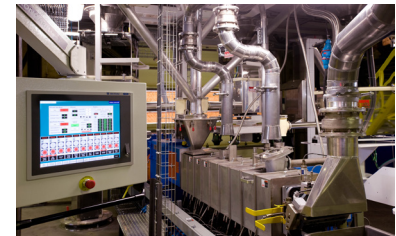

Telemetry & Software

Water & Waste Water Management

Hydrology, Metrology & Geology

Our Strengths

- Ambient Air Quality Monitoring
- Ground Water Level Recorder(DWLR)
- Weather Stations (Metrology)
- Flow and Discharge Monitoring
- Continuous Emission Monitoring System (CEMS)
- Effluent Quality Monitoring Systems (EQMS)
- River Quality Monitoring System (RTWQMS)
- Multi Parameter Water Quality Sonde
- Heavy Metal Water Quality Analyzers
- Hg, HCl, NH₃ & HF Analyzers
- Water Samplers & Ultrasonic Flow
- Snow and Ice Monitoring System
- Analytical Water Monitoring Instruments
- Process Monitoring Analyzers and Instruments
- Electromagnetic Flow Metres
- Radar Velocity, Level and Discharge Monitoring
- Environment and Process Laboratory Instruments
- Data Logger and Telemetry Instruments
- PLC, DCS, Electrical Drives, MCC, PCC
- Automation System Integrator

Aaxis Automation

Established in 2006, we thrived to extend services towards the **utility, environment, electrical and engineering fields with SCADA, process control and systems integration services.** Our integrated SCADA & Data Acquisition Software was formed from a market demand for a trusted, reliable and sustainable service provider with a modern innovative approach. Boasting a combined 12 years plus experience in the provision of software, DAS, engineering and process control services across a broad and diverse client base, integrated SCADA aims to be your

From concept and initial specification phase, through to detailed design, development, integration and commissioning.

The core competencies offered by integrated SCADA include:

- » RTU and PLC SCADA systems
- » HMI engineered control solutions
- » Power System Protection Schemes
- » Industrial Network
- » Protocol Integration
- » IEC61850 application to SCADA and Protection Schemes
- » Time Synchronisation
- » Remote Access and Engineering
- » Industrial Process Control and Automation
- » Remote Telemetry and Data Acquisition Software
- » Project and Technical Management

TOWARDS OUR CLIENTS

We assist our clients in partnership to establish consistently high standards. We are committed to assisting clients facing pressure in a regulated industry to ensure value to owners, operators and customers. A strong attention to detail and a focus on consultative and inclusive development in partnership with our clients ensures consistently high-quality outcomes. This approach provides a knowledge transfer to those that maintain and operate the asset, in contrast to providing turnkey solutions without understanding its implementation. Through continuous improvement, a professional and responsive approach, and a motivated team, integrated SCADA realizes innovation and industry best-practice.

“Our services are a positive investment, giving the best performance, service life, reliability, security and support”.

"Our organisation progress in the field of Process, Environment Management, Automation, Hydrology, Geology & Software"

“ Aaxis Vision ”

Organisation progress in the field of Process, Environment Management, Automation, Hydrology, Geology & Software.
Continuous growth with sustained research, innovations and engineering.
Continue to build the organization that is recognised for its values, integrity and ethics.

“Aaxis Mission”

Inspiration Innovation Integrity

These fundamentals gives us direction to create value for our customers, wealth for our stakeholders & ensure prosperous future for our employees. Our fundamentals ensure the society upgradation, country development, and above all our planet security. Our mission is to enable our customers to make the world healthier, cleaner and safer.
